EXPERIENCE

EduSkill & Google for Developer   **Online**

AI & ML Virtual Intern   *Apr 2024 - Jul 2024*

During my virtual internship with EduSkills, I developed a Machine learning project focused on predicting diabetes risk.

Technologies Used: Python, Scikit-learn, Pandas, NumPy, vs code.

Data Analysis: Utalized data Preprocessing techniques to clean and prepare the dataset for Model training. Analyed various features to identify key predictors of diabetes.

Model Development: Implement and compared several machine learning algorithms , including logistic regression, decision trees, and random forests, to develop an accurate predictive model.
